

Put your adjuster virtually in the home by offering policyholders a contactless option for documenting interior damage - in fewer than 2 minutes per room! Anyone with an iPhone or Android device can take the pictures.

Plnar powers virtual claims by providing simplified data capture, allowing anyone with a smartphone to document interior property damage. SmartPix technology transforms any photo captured into fully measurable, interactive 3D models.

- Implement in minutes
- Imports to Xactimate
- Maximize ROI

SNAPSHOT

DETERMINE MOI QUICKLY & ACCURATELY
Perfect solution for claim triage, low-severity or total loss claims. Provides photos and room videos instantly upon project submission that can be converted to full 3D optionally.

SNAPSHOT AI

AI-POWERED HOME INSPECTION
ML auto detection of contents and materials as well as face and text scrubbing immediately available upon project submission.

SNAP 3D

BE THERE VIRTUALLY
Plnar's flagship solution - captures everything in a room from the smallest architectural elements like a bump out, to appliances to contents. 2D, 3D plans, measurable photos, and a suite of reports.

SNAP 3D+ FLOORPLAN

COMPLETE VIEW OF THE LOSS SITE
Get full context of the loss site with 2D plans of adjacent rooms stitched together. Visualize the relationship between rooms and instantly understand the space.

Plnar is an InsureTech software provider transforming the insurance claims process by enabling virtual inspections for interior property claims for significantly better customer experiences, shorter cycle times and lower costs.
